

Innovation Trail Finalist

Nayax UK – Stand J38 VPOS Touch Cashless Solution

VPOS Touch by Nayax is a complete payment solution and remote secure terminal for unattended automated machines. As the need for cashless payment capabilities increases in the parking sector – by consumers, operators and municipalities – VPOS Touch offers a cost effective, efficient solution accepting payment transactions via credit or debit cards, prepaid cards, mobile app payments and QR codes.

VPOS Touch accepts all leading payment methods, including VISA, Mastercard, PayPal, Apple Pay, Samsung Pay, Android Pay, MobilePay, Twint, WeChat Pay, Alipay, Nayax's own Monyx Wallet payment app and more.

VPOS Touch represents an exciting breakthrough in customer relations for operators of unattended automated machines, with unprecedented consumer engagement and limitless cashless payment capabilities around the globe. A comprehensive solution, VPOS Touch seamlessly integrates telemetry, cashless clearance, management and BI systems, while accepting all cashless payment methods. VPOS Touch is ideal for open and closed environments.

In addition to comprehensive features such as monitoring sales, management, alert systems and customized reporting, Nayax offers operators innovative consumer engagement and marketing opportunities ranging from the ability to build loyalty programs, set discounts, digital punch cards, e-receipts, branded top-up websites and more, all to increase brand awareness and sales. A Smart Technician mode is available for better machine management and reduction in maintenance time.

Nayax is a leading cashless payments, telemetry and management and BI solutions provider for unattended machine industries. Established in 2005, over 250,000 devices use Nayax solutions in more than 55 countries.
